PRESS RELEASE

30 October, 2026

Turkish Banking Sector Main Indicators *
(September 2026)

According to provisional data submitted by banks to our Agency, the total assets of the Turkish banking sector reached TRY 56.982.049 million as of September 2026, marking an increase of TRY 10.035.251 million compared to the end of 2025.

As of the same date, loans, which constitute the largest component of assets, stood at TRY 28.765.658 million, while securities holdings amounted to TRY 8.056.656 million. From year-end 2025:

- Total assets grew by 21,4%,

- Total loans increased by 24,4%

- The securities portfolio expanded by 14,9%.

The non-performing loan (NPL) ratio was realized at 3,05%.

Deposits, representing the primary funding source of the banking sector, increased by 20,4% compared to the previous year-end, reaching TRY 32.768.446 million.

During the same period, the total shareholders' equity of the banking sector increased by 16,4% relative to year-end 2025, reaching TRY 4.835.574 million. As of September 2026, the sector's net profit amounted to TRY 780.915 million, while the capital adequacy standard ratio stood at 16,70%.

Respectfully announced to the public

(*) Prepared based on data dated 30 October, 2026. Banks' reports, submitted on an unconsolidated basis are used.
